

# *IIT Indore to start 10 new courses from upcoming session*

OUR STAFF REPORTER  
city.indore@fpj.co.in

Not one, two or three but Indian Institute of Technology Indore is all set to start 10 new courses including four new BTech and six new MTech programmes, from the new academic year 2023-24.

These courses include BTech in Chemical Engineering, Mathematics & Computing, Engineering Physics and Space Science & Engineering with an

## **Chemical Engineering will be taught for the first time in the elite technical institute of Indore**

intake of 30 each totalling 120 seats.

Chemical Engineering will be taught by the institute for the first time.

The new MTech programmes will be offered with specialisation in Computer Science & Engineering, Water, Climate & Sustainability, Biomedical Engineering, Applied Optics & Laser Technology, Structural Engineering and Defence

Technology with a total intake of 75.

IIT Indore director Prof Suhas S Joshi said, "The institute is constantly introducing several new concepts of translational learning, skill development and new programmes under National Education Policy 2020. The faculty recruitment and development of infrastructure for the conduct of these cours-

es is already in progress. The courses are designed keeping in mind the requirements of industry and future technology. The courses are interdisciplinary in nature and students will receive exposure in various cutting-edge fields."

Aspiring students may visit the institute's website at <https://iiti.ac.in/new-prog/> link for more details. In addition, seats in the existing MTech programmes in Space Engineering, Thermal Energy Systems and Electric Vehicle Technology have been increased to 10.
