IIT Indore is going to conduct an Open House for JEE (Advanced) qualified students on June 22 for providing them with an opportunity to know more about the institute.

"Be it campus life, placement, research, international avenues, sports, culture, health, safety etc, all the insights about the institute would be provided.

It will also provide a chance to interact with the director, deans, senior functionaries and student representatives," said a press release issued by IIT Indore.

Such insights and interactions help potential stu-

dents to understand how the institute can mould them to turn their dreams into reality.

The event will be conducted online, and the details are available on the institute's website.

"The institute has improved its NIRF ranking this year and expects that the JEE rankings for every discipline will improve considerably. Further, four new BTech programmes are also being introduced this year. These are Space Science & Engineering, Chemical Engineering, Mathematics & Computing and Engineering Physics. This takes the tally of BTech programmes to 9," the press release said.
