IIT Indore's EARTH Lab is hosting a workshop on "Reinventing Waste Management Practices for a Cleaner Planet (REWAMP) towards environmental sustainability from March 11 to 16. REWAMP is aimed at propelling scientific research in India towards sustainable waste management solutions.

"The speakers, both from academia and industry, would share their insights and expertise.

Attendees will delve into various dimensions of waste management, including solid waste, circular economy practices, life cycle assessment, and entrepreneurial perspectives, among others," said IIT Indore media coordinator Sunil Kumar.

"The workshop provides an unparal-

leled platform for experts and research scholars to converge, exchange ideas, and explore innovative solutions for a sustainable future. It represents a significant stride towards addressing the global challenge of sustainable waste management, contributing significantly to the nation's environmental goals," he added.

Dr. Ashootosh Mandpe, assistant professor, Department of Civil Engineering, who is the organiser of the event said "REWAMP is a focal point for undergraduate, postgraduate, and research scholars from leading institutions nationwide, including IITs, NITs, IISERs, ICAR, CSIR, and various state institutes/universities, which provides them a unique opportunity to immerse themselves in the collaborative environment and experiential learning opportunities offered by the workshop."
