Indian Institute of Technology (IIT) Indore hosted and organised the 12th edition of IEEE international conference on advanced networking and telecommunications (ANTS) from December 16 to 19. The theme of this year's conference was 'Towards a Hyper-Connected World: Emerging Trends in ICT'.

The conference was organised with a number of invited keynotes, workshops, panels, tutorials and research papers advancing the state of the art. Another notable feature of the conference was a dedicated session for women in engineering (WiE) to attract and inspire more women into engineering and technology.

Numerous multinational companies and government organisations lent their support to the conference which was attended by over 200 attendees, with support from over 15 industry, government and institutional partners.

In addition with technical papers, workshop on 5G and Future Wireless Technologies (5G-FWT 2018) was also conducted.
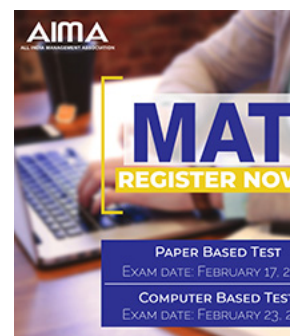

Director of IIT Indore, Pradeep Mathur, thanked all the participants for choosing to identify the institute to host the conference and said, "As an institute with the sharpest growth trajectory, the choice of IIT Indore as the hosting institute is very appropriate and I am sure that the conference has been able to generate new ideas and motivate researchers in the areas to push the frontiers of science."
