

# IIT-I Organises Workshop On Water Management

Indian Institute of Technology, Indore, hosted a one-day workshop — Water Management: Sustainability and Standardization — recently, to discuss critical issues related to water management and implementation of sustainable practices. The workshop emphasized interdisciplinary approach needed for effective water management. Dr Akhilesh Gupta, visiting professor at IIT-I and former senior advisor at DST was the chief guest. IIT-I director professor Suhas Joshi was also present during the workshop. Dr Gupta emphasized the critical role of

policy and standardization in achieving sustainable water management, while professor Joshi showcased the institute's commitment to water sustainability and innovative methods deployed to recharge the water through proper arresting. The lectures included the importance of global challenges in water management, standards in water management, insights into technological innovations in water sustainability, practical applications of water management standards and recent advancements in water management research.
