

IIT Indore Hosts Symposium On Materials For Sustainable Development

IIT Indore organised its first International Symposium on Materials for Sustainable Development (ISMSD 2024) recently, bringing together global researchers to discuss emerging materials and their role in sustainability. Experts from India, UK, Russia, Finland, Thailand and Malaysia discussed bio-based polymers, next-generation electronics, advanced metallic materials and sustainable improvements in materials like steel and concrete. Dr Siddhartha Misra, chief research process at Tata Steel, was the chief guest. The event, sponsored by SPARC, aimed to foster interdisciplinary research and collaboration for sustainable development. It also provided young researchers opportunities to engage with global experts.
