INDORE

In a display of its dedication to innovation and technological advancements, Indian Institute of Technology Indore marked a groundbreaking year in research and development setting new records with 30 patents granted and achieving an impressive 78 per cent growth in patent filings.

In 2024, the institute saw a remarkable 41 per cent rise in all the Indian patents it re-

ceived so far. IIT Indore also secured two design registrations and successfully licensed two technologies to the industry partners, showing its com-

mitment to the real-world applications of research.

A key highlight of the institute's achievements is the granting of 30 patents last year boosting its total patent portfolio to 76, including 74 Indian and two US patents. The year-wise analysis of patent grants shows an upward trajectory with a sharp increase in 2024 compared to previous years. The elite institute filed 41 patents in 2024, compared to 23 in 2023, contributing to a

total of 165 patents filed over the years. The surge reflects the increasing emphasis on innovation, expanding research capabilities and intellectual property at the institution.

"With a focus on research excellence, patent filings and industry partnerships, IIT Indore is poised to make even greater strides in the coming years, contributing largely to India's innovation-driven growth," said IIT Indore public relations officer Sunil Kumar.
