IIT-I showcases solutions at India AI Summit

TIMES NEWS NETWORK

Indore: IIT Indore showcased its technological prowess at the India AI Impact Summit 2026, presenting a diverse range of AI-driven solutions across healthcare, agriculture, and smart infrastructure.

The institute's exhibition stall drew significant attention for the AgriHub's precision farming models and IITI Drishti CPS Foundation's scalable digital healthcare systems.

Director Suhas Joshi said, "AI must move beyond laboratories to create measurable societal impact. We are committed to developing responsible and inclusive solutions for national development."

Dean (R&D) Abhirup Datta emphasised that research at the institute was driven by relevance, aiming to solve pressing challenges through data-driven intelligence. "By fostering interdisciplinary collaboration, the institute continues to bridge the gap between academic excellence and deployable technology, strengthening deep-tech ecosystem through industry partnerships," he said.
