International workshop on recent advances in space science at IIT

International Workshop on Recent Advances in Space Science was organised at IIT Indore on Monday. Dr Lisa Haskell, Airbus Defence and Space, UK and Dr Keely Roth, senior remote sensing scientist, The Climate Corp, USA delivered keynote lectures in the International Workshop on Recent Advances in Space Science held at IIT. The distinguished experts discussed in detail the specific applications of data science in the context of remote sens-

ing, agriculture and related applications crucial for the general public, and critical for ensuring the provision of resources for the growth. The specific aim of this workshop is to gather experts in remote sensing, data science and machine learning, and facilitate the participants to interact with them on different aspects of these topics. This workshop thus provided a forum for exchanging ideas and information on current research studies, challenges, system develop-

ments, and practical experiences in the emerging field of space sciences. "The fascination that Space holds, ought to be shared with youngsters, for, this is the best path to inducing the sense of wonder and the spirit of enquiry in them; this is what will carry them forth despite hardships. Per Ardua, Ad Astra!" professor Pradeep Mathur, Director of IIT remarked while stating his vision for the future of space science and technology research
