

IIT Indore classes to start on August 9 in online mode

Indore: Classes of existing batch of Indian Institute of Technology Indore would start in online mode from August 9. Before that, a two-day orientation would be held. The institute has allowed students to return to the campus in limited numbers. In small batches, all students will be called back. All students would be put under quarantine for 14 days on reaching the campus. After all students complete the quarantine period then the institute would shift to offline class mode.

"As we are not allowing all students to return, so classes can't be held offline. And then there is 14-day quarantine period rider. So, initially, the students will have to attend classes in online mode. Later, when the Covid-19 situation further eases and campus will be declared free from coronavirus, then decision on offline classes can be taken," said IIT Indore public relation officer Sunil Kumar.
