Other institutes can now access IIT-I lab

TIMES NEWS NETWORK

Indore: Students of other academic institutions can now virtually use the state-of-the-art laboratories of the Indian Institute of Technology, Indore (IIT-I).

The institute has launched a new programme — Online Teaching Laboratories — under which access to world class laboratories would be extended to other academic institutions. Earlier, students of other academic institutions were allowed to visit facilities as part of a tour, but now they

IN VIRTUAL MODE

would be able to use these for their academic purpose as part of the new programme.

The institute's Resource Generation dean Professor

Anand Parey said "We have designed experiments keeping in mind that it covers syllabus of many universities. The labs will be conducted online with real time demonstration of experiments. The labs will be interactive, where students can clarify their doubts instantly."

"It will enable students to participate in various stages of experiential learning, including conceptualization and experimentation followed by reflection, analysis and interpretation of data. Laboratory

classes will provide students with first-hand experience with course concepts and opportunity to explore methods used by practitioners in their respective disciplines," said Parey.

An e-certificate will be issued to students on successful completion of the laboratory sessions. The Institute is already conducting a 'Vigyan Par Charcha' programme to provide hands-on knowledge on various subjects to school going students as well as teachers.
