**Indore:** Fluxus-2012, a three-day cultural-cum-technical fest of Indian Institute of Technology (IIT-I) began on a warm note from Thursday.

Kicking off the event on Thursday, A K Balasubramaniam of Nuclear Power Corporation of India Limited delivered a lecture on the use and sustainability of nuclear energy.

Balasubramaniam is associated with the building of various nuclear reactors across the country. Giving a brief overview of the working of a nuclear reactor along with its safety aspects, he said that nuclear reactors were safe and the country has excellent track record vis-à-vis in the safe running of nuclear plants. Mishap in Japan doesn't mean it will happen in India, he said.

Elaborating on the nuclear power, Balasubramaniam said it is relatively a new field and there are tremendous opportunities in the field of research. It is a field, which can suffice to the energy needs of the country, he said.

A workshop on VoIP Robotics and 3D animation was also held. Various robots like line follower, light follower and their coding were taught at this workshop over two days.

The students will be taught on various methods to convert 2D into 3D. Further, a line follower robot competition called "ROBO 1" was organised in which teams from various cities including Bhopal, Gwalior and Ujjain participated.

Events like LAN Gaming, literary events like "Cache of the lexis" and "Ransense" were the attractions of the day. Besides, there were informal games like face painting, twister and many others that kept the audience enthralled.
