**INDORE:** Indian Institute of Technology (IIT- Indore) has signed a memorandum of understanding (MoU) with CSIR-CEERI (Council of Scientific and Industrial Research-Central Electronics Engineering Research Institute), Pilani over a range of collaborative research works.

CSIR-CEERI, a premier research institute in the field of Electronics, will help improve research collaborations between the two institutes, including exchange of staff, students, publications and materials, joint supervision of Master's and Ph.D. students and organisation of research programmes and conferences.

A workshop was held on Monday which was inaugurated by director of IIT-Indore professor Pradeep Mathur and professor Santanu Chaudhury (director, CSIR-CEERI). The workshop was organized by Discipline of Computer Science and Engineering, IIT Indore.

This was followed by the MoU signing ceremony and talks on identifying areas of mutual interests. This included presentations from IIT-Indore faculty members and a four-member scientific delegation accompanied by prof Chaudhury.

The groups have also been asked to submit proposals for joint research.
